Subject Index to Volume 13

Ciliary body	Electron microscopic study of rabbit ciliary body irradiated with X-ray in comparison with results obtained with fast neutrons (*Mukai*)	187
Conjuctiva	An electron microscopic study of the conjunctival vessels. Analysis of the vascular pathology with PAM impregnation technique (*Hara* et al.)	171
Conea	Ultrastructure of Langerhans cell in human corneal limbus (*Sugiura* et al.)	197
	A new epithelial cell culture and measurement of oxygen up-take per cell (*Shimoide*)	203
	Polygonal Cells, Pale Stained Cells and the Cellular Constituents of the Epithelium of the Human Cornea (*Wakui*)	239
Diabetes	Electron Microscopic Study on the Small Blood Vessels in Rubeosis Iridis Diabetica (*Tamura*)	65
	The immunological study on diabetic retinopathy (*Ishikawa* et al.)	150
Electromyography	Electromyographic Study of the Misdirection Syndrome of the Oculomotor Nerve in Extraocular Muscles (*Maruo*)	1
Electron microscopy	Electron Microscopic Studies on the Human Extraocular Muscles under Pathologic Conditions (*Mukuno*)	35
	Electron Microscopic Study on the Small Blood Vessels in Rubeosis Iridis Diabetica (*Tamura*)	65
	An Electron Microscopic Study of the Human Iris Vessels —With Special Reference to the Vascular Changes on Aging, Using PAM Staining Technique (*Yamanouchi* et al.)	79
	Electron microscopic studies of leaking vessels of the eye (*Sakuragi*)	158
	An electron microscopic study of the conjunctival vessels. Analysis of the vascular pathology with PAM impregnation technique (*Hara* et al.)	171
	Electron microscopic study of rabbit ciliary body irradiated with X-ray in comparison with results obtained with fast neutrons (*Mukai*)	187
	Ultrastructure of Langerhans cell in human corneal limbus (*Sugiura* et al.)	197

	Electron Microscopic Study on Retinas of Choline-Deficient Rats (*Yamanobe* et al.)	227
Electrophysiology	Electromyographic study of the misdirection syndrome of the oculomotor nerve in extraocular muscles (*Maruo*)	1
	The Short Latency Unit Response Photically Evoked in the Albino Rabbit Lateral Geniculate Body (*Yonemura* et al.)	97
	Oscillatory potentials in electro-retino-dynamography (*Usami* et al.)	211
Electroretinography	Oscillatory potentials in electro-retino-dynamography (*Usami et al.*)	211
Extraocular muscles	Electromyographic study of the misdirection syndrome of the oculomotor nerve in extraocular muscles (*Maruo*)	1
	Electron microscopic studies on the human extraocular muscles under pathologic conditions (*Mukuno*)	35
Fruorescent antibody technique	Leukocyte-binding serum-globulin (LBG) in patients with ocular diseases: Studies with fluorescent antibody technique (*Araki*)	135
Hyperphoria, alternating	Alternating Hyperphoria (*Kubota*)	9
Hypertension	Study on Experimental Hypertension (*Takahashi et al.*)	52
Immunology	Leukocyte-binding serum-globulin (LBG) in patients with ocular diseases: Studies with fluorescent antibody technique (*Araki*)	135
	The immunological study on diabetic retinopathy (*Ishikawa et al.*)	150
Iris	Electron microscopic study on the small blood vessels in rubeosis iridis diabetica (*Tamura*)	65
	An Electron Microscopic Study of the Human Iris Vessels —With Special Reference to the Vascular Changes on Aging, Using PAM Staining Technique (*Yamanouchi et al.*)	79
Misdirection syndrome	Electromyographic study of the misdirection syndrome of the oculomotor nerve in extraocular muscles (*Maruo*)	1
Myopia	Changes in Ocular Refractive Components and Development of Myopia during Seven Years (*Tokoro et al.*)	27
Ocular motility	Electromyographic study of the misdirection syndrome of the oculomotor nerve in extraocular muscles (*Maruo*)	1
	Alternating hyperphoria (*Kubota*)	9
	The Triangle Syndrome Associating with the A-V Syndrome in Strabismus (*Yuge*)	18

Optic nerve	The Short Latency Unit Response Photically Evoked in the Albino Rabbit Lateral Geniculate Body (*Yonemura et al.*)	97
	Observation on New-grown Fibers in the Optic Nerve (*Matsuyama*)	105
	The Fastest Conduction System in the Visual Pathway of the Rabbit (*Yokoyama et al.*)	117
Radiation	Electron microscopic study of rabbit ciliaty body irradiated with X-ray in comparison with results obtained with fast neutrons (*Mukai*)	187
Refraction	Changes in ocular refractive components and development of myopia during seven years (*Tokoro et al.*)	27
Retina	Study on experimental hypertension (*Takahashi et al.*)	35
	The immunological study on diabetic retinopathy (*Ishikawa et al.*)	227
	Electron Microscopic Study on Retinas of Choline-Deficient Rats (*Yamanobe et al.*)	
Syndromes	Electromyographic study of the misdirection syndrome of the oculomotor nerve in extraocular muscles (*Kubota*)	1
	The Triangle syndrome associating with the A-V syndrome in strabismus (*Yuge*)	18
	The Ophthalmic Disturbance as the Cranio-Cervical Syndrome due to Whiplash Injury (*Narazaki et al.*)	263
Triangle syndrome	The triangle syndrome associating with the A-V syndrome in strabismus (*Yuge*)	18
Uveitis	Leukocyte-binding serum-globulin (LBG) in patients with ocular diseases: Studies with fluorescent antibody technique (*Araki*)	135
Vitreous	Basic Protein of the Vitreous in Normal Rabbit (*Hirose*)	126
Whiplash injury	The Ophthalmic Disturbance as the Cranio-Cervical Syndrome due to Whiplash Injury (*Narazaki et al.*)	263

Index of Authors to Volume 13

A ARAKI Yodatsu: Leukocyte-binding serum-globulin (LBG) in patients with ocular diseases: Studies with fluorescent antibody technique 135

H HARA Masayoshi: An electron microscopic study of the conjunctival vessels. Analysis of the vascular pathology with PAM impregnation technique 171

HIROSE Seiichiro: Basic protein of the vitreous in normal rabbit 126
